

Case Study for Raleigh Trust

'FaceEd has been instrumental in delivering part of our people strategy to systemise the recruitment process. We have recruited 42 staff from 152 applications in one year efficiently, effectively and paper-free.'

Sally Boaden, Chief Operating Officer at Raleigh Education Trust

Education Recruitment Software

Before

Before FACE-Ed, a lot of our time was spent on shortlisting, chasing references and going back and forth to set up interviews.

Vacancy requests were approved on paper as part of a lengthy process. Now the process is online and streamlined, everything is so much quicker, it's fantastic.

We would have to meet with candidates to gather information and now they can upload everything online, which saves lots of time and hassle.

Experience

It is very methodical, easy to manage and follow, guiding staff through the correct process.

To be able to just touch a button to send out the references is brilliant and has led to references coming back much quicker, you can complete it online and send reminders.

It has also helped to solidify us as a team and our employees are embracing it.

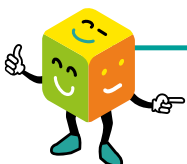

Impact

As Safer Recruitment Accredited Trainers, FEPS have thought of everything. FACE-Ed provides a systematic approach, so you can't move on until a check has been completed.

FACE-Ed has solved a lot of problems for us and since we started using the software, we have managed to hire 24 people with relative ease. It has been brilliant saving time and money.

It helps to reduce the worry around recruitment. I would absolutely recommend it, without a shadow of a doubt.
